

Release Notes

Version 3.11

Release Features

DataArchiva version 3.11 has come up with the following new features.

Fields to Exclude

DataArchiva now provides the option to exclude fields which gives the user liberty to choose the fields they don't want to archive

Archive data access restriction.

Now Archive data can be viewed based on the user permission applicable as per Salesforce

Console App

DataArchiva now supports the Salesforce console app.

Enhancements

The following enhancements have been done for some of the current DataArchiva features.

Enhancement #1

Auditing: Now DataArchiva auditing is enhanced to support more events which in turn provides more accurate data in Dashboard

Enhancement #2

Archive data Detail Page is revamped to support any number of Parent-child relationship and with this, the Archive data look and feel will be similar to Salesforce Detail Page

Note: Fixed many bugs in this release which were related to performance, security, and stability
